

OIL & GAS LOGISTICS

INTIME FREIGHT

www.intimecargo.co.ke

The oil and gas ministry demands the highest standards in logistics management. The complexity and scale of the projects, in some of the world's most difficult terrains and most remote locations, require proven expertise and total reliability. As one of the world's leading logistics provider, INTIME FREIGHT has the experience and the infrastructure to fully support the extreme challenges of the industry, our integrated services, planning the entire supply chain, are driven by 550 dedicated oil and gas specialists across 50 global locations.

Our core solutions are focused on:

- Supply chain management
- Rig and Maritime Support
- Project Management
- Base-to-Base Logistics

From the deserts of Turkana, **INTIME FREIGHT's** proven solutions and experts teams handle the most demanding of projects. No two assignments are ever the same, so a strong project methodology is vital. Our strength lies in modeling effective operational solutions around these central competencies to ensure that our clients receive the optimal solution every time. Just as important is our belief in a partnership approach, ensuring a collaborative working mentality is created from the initial feasibility studies, through operational streamlining, to final implementation.

Quality project design is supported by industry-leading visibility and monitoring information systems, as well as advanced warehousing and inventory management. Through our global network you will benefit from the full range of transport modes:

Sea freight-Flexible solutions through guaranteed space with leading carriers, real time visibility and monitoring, and an advanced consolidation capability-as you would expect from a market leading sea freight provider.

Air freight-Extensive range of international airfreight products to ensure time-sensitive cargo travels the most cost-effective way.

Road and Rail- Door-to-Door overland solutions across our extensive international network, providing the flexibility to meet your fluctuating operational demands.

Contract Logistics-We have warehousing services available, supported by the latest technology and a range of value-added inventory management solutions.

YOUR OIL & GAS LOGISTICS ADVANTAGES

- Dedicated specialists in key oil and gas locations
 - HSE Controlled processes
 - Key Account management structure
 - Shore-Based support services
 - Tailor made industry solutions
 - Specialized rig competence centre
 - Strategic hub operations with pipe yard management
- INTIME FREIGHT's regional capabilities and resources are globally integrated to support customers in virtually any location with:
- Global Supply Chain
 - Global Standards and Systems
 - Global Resource Pool.

SUPPLY CHAIN MANAGEMENT

Our core strength is the proven ability to build long-term, value-adding business relationships with energy customers whose supply chain requirements are especially demanding and complex. By working closely and building a partnership, **INTIME FREIGHT** quickly understands the needs of your business. This enables us to manage the complete supply chain- from planning to operational phase.

We design transportation solutions, assist with the freight budget, and develop cost-effective supply chain models that leverage the most complex consolidation opportunities.

- Knowledgeable, dedicated account management teams
- Material tracking through a specifically designed system for energy industry
- Purchase order and vendor management

KEY BENEFITS

- Optimization of supply chains
- Dedicated account management with multimodal contacts- globally, regionally and locally
- Increased visibility through the supply chain (end-to-end)
- Greater flexibility to react to situations
- Systematic measurement of KPIs
- Full control of real time status updates via **INTIME FREIGHT** Login and oil and gas IT solutions
- Rigorous supplier management process

OIL & GAS LOGISTICS

RIG & MARITIME SUPPORT

INTIME FREIGHT offers an extensive state-of-art support service for the offshore industry.

In addition to our shipping agent role, we hire all types of offshore vessels, barges and rigging, and helicopters. We can provide purchasing services and manage the mobilization and de-mobilization of offshore projects. The departments operating rig & maritime support are designed to give our clients the best of services. Short communication lines and 24/7 accessibility will ensure that all customer needs are satisfied within a short period of time.

Services

- Chartering of offshore vessels/helicopters
- Coordination of the mob/de-mob of vessels
- Crew management
- Husbandry services
- On/off hire management of equipment and barges
- Procurement
- Ship Agency/ Vessel Clearance

KEY BENEFITS

- Expert staff to ensure maximum efficiency of service and risk minimization
- Multimodal rig solutions
- Cost and inventory control
- Availability around the clock
- Product knowledge and understanding of specific rig management service requirements
- All work processes carried out to ISO compliant standards

PROJECT MANAGEMENT

The role of our oil and gas project management specialists is to help our clients succeed. The challenges of large scale installations, with their complex components, are met every day by our dedicated teams. Through long experience, we have built expertise in the most demanding environments, both onshore and offshore, and successfully completed countless projects around the globe.

The central philosophy of our project management is to build projects from the ground up. With careful planning and close collaboration, we ensure that years of experience can provide benefit at every stage. We treat each project as unique and will work hard to create the best possible solution.

Services

- Customs and documentation requirements
- Global logistics planning and forecast feasibility studies
- Multimodal transport recommendations
- Presentations of proposals and alternatives
- Special chartering group
- Stowage, lashing and security planning
- Supervision and execution

KEY BENEFITS

- Specialized staff
- Cost saving through early involvement in project planning
- Visibility on complex supply chains
- Cost savings through consolidation and shipment optimization
- Tailored project design around proven processes and established IT solutions
- Flexibility in assigning experienced project teams to all necessary geographical areas.

OIL & GAS LOGISTICS

**OIL & GAS
LOGISTICS**

BASE-TO-BASE LOGISTICS

The right level of support on the ground is crucial to our clients. They need their products delivered as quickly, safely and efficiently as possible. To support this, we manage our own fleet of modern trucks, capable of transporting a wide range of parts required by the oil and gas industry. Our fleet are coordinated and guided by our control tower methodology, allowing us to provide integrated end-to-end solutions through multimodal transport coordination. We have experienced operators in base-to-base transportation and have established networks in the major oil and gas regions.

Services

- Control tower methodology
- Established networks in major oil and gas regions
- Multimodal integrated solutions
- One-stop shopping for movement of assets and supplies
- Transport of special equipment and offshore containers

KEY BENEFITS

- Comprehensive HSE and compliance processes
- Efficient pricing by concentrating on one provider
- Improved visibility allowing field locations to make better planning and operational decisions
- Reduced exposure to handling and communication errors.

Compliance

As a leading supplier in the oil and gas industry, **INTIME FREIGHT** is fully committed to all its compliance obligations. We adhere to both internal and external codes of practice to ensure that our services are of the highest standards and that we are acting as responsible corporate citizen. Externally, we follow and enforce local laws and other international legislation. As a global organization we ensure that regulations are followed regardless of the region in which our employees are operating. Internally, our code of conduct, policies and procedures are guided by industry standards and implemented by a department solely dedicated to this activity.

HSE AND QUALITY ASSURANCE

INTIME FREIGHT treats the health, safety and environmental (HSE) concerns of the oil and gas industry with the utmost respect. We actively pursue practices to provide a risk-free working environment for our employees, business partners and customers. The standards we uphold and enforce are defined by the global certifications ISO 9001 and OSHAS 1001. These certifications are held on a local operational level, to ensure best practices are always maintained where our customers, suppliers and staff need them. To make sure industry standards are upheld across the whole supply chain, **INTIME FREIGHT** implements a strict supplier management and selection process. A dedicated department, providing clear organizational direction and an internal reporting structure, globally manages our HSE activities.

INTIME FREIGHT Login & OIL AND GAS IT SOLUTIONS

With **INTIME FREIGHT** Login, our visibility and monitoring information management system, customers can track their shipments-through a single web-based interface. **INTIME FREIGHT** Login is a single system that links all modes of transport around the globe, providing our clients with the sort of detailed information they need, in the way they need to see it.

With customized reports and EDI capabilities, **INTIME FREIGHT** Login can be personalized to suit the needs of every client and every client and every project, including own-reference terminology and summary view screens. This access to near real time data drives significant improvements in productivity and efficiency. The monitoring capabilities offer enhanced exception monitoring and alerts, enabling customers to manage their supply chains more effectively.

To complement our industry-leading **INTIME FREIGHT** Login platform we have developed a web-based IT Solution customized for the oil and gas industry. The separate system provides all the benefits of the **INTIME FREIGHT** Login platform, with added features to meet the specific needs of the oil and gas industry. These enhancements include improved monitoring and alerting capabilities at shipments, order and item level. The system also offers more detailed reporting and the ability to calculate charges at order level. To ensure flexibility in data entry, both EDI and manual data entry are available.

KEY BENEFITS

- Cargo receipt/line item checking
- Customized reports
- Dashboard access
- Document upload
- EDI
- Image Upload
- Interactive delivery planner
- Monitoring and alerting
- Order management
- Statistics
- Warehousing.
